Why matter matters. 50 years elementary particle physics – Festschrift for Lev B. Okun

editors

V.L. Telegdi, K. Winter

Communicated by J.V. Allaby

Contents

Preface xiii
Curriculum vitae of Lev Borisovich Okun xv
Publications xv

I. General subjects
A.D. Dolgov, Long-range forces in the universe 1
S.D. Drell, Cooperation between scientists and the government in the US: benefits and problems 17
J.D. Jackson, From Alexander of Aphrodisias to Young and Airy 27
I.B. Khriplovich, Particle creation by charged black holes 37
L. Stodolsky, Decoherence–fluctuation relation and measurement noise 51
V.I. Zakharov, Anatomy of a confining string 59

II. Supersymmetry
A. Ali, D. London, Precision flavour physics and supersymmetry 79
G. Dvali, M. Shifman, Tilting the brane, or some cosmological consequences of the brane Universe 107
I.V. Gaidaenko, A.V. Novikov, V.A. Novikov, A.N. Rozanov, M.I. Vysotsky, Enhanced electroweak radiative corrections in SUSY and precision data 119
N. Nekrasov, S.L. Shatashvili, On non-supersymmetric CFT in four dimensions 127

III. Strong interactions and QCD
N.O. Agasian, B.O. Kerbikov, V.I. Shevchenko, Nonperturbative QCD vacuum and colour superconductivity 131
M.S. Chanowitz, Quantum corrections from nonresonant WW scattering 139
S.L. Dubovsky, D.S. Gorbunov, M.V. Libanov, V.A. Rubakov, Non-renormalization of induced charges and constraints on strongly coupled theories 147
S.S. Gershtein, A.A. Likhoded, A.I. Onishchenko, TeV-scale leptoquarks from GUTs/string/M-theory unification 159
I.P. Ivanov, N.N. Nikolaev, A.V. Pronyaev, W. Schäfer, How unitarity imposes a steep small-x rise of spin structure function $g_{LT} = g_1 + g_2$ and breaking of DIS sum rules 175
D.I. Kazakov, The Higgs boson: shall we see it soon or is it still far away? 187
V.A. Kuzmin, I.I. Tkachev, Ultra-high-energy cosmic rays and inflation relics 199
L.G. Landsberg, Search for exotic baryons with hidden strangeness in diffractive production processes 223
L.N. Lipatov, Hamiltonian for Reggeon interactions in QCD 249
S. Matinyan, Multiparton collisions and multiplicity distribution in high-energy $pp(\bar{p}p)$ collisions 261

Elsevier Science B.V.

Yu.A. Simonov, Perturbative–nonperturbative interference in the static QCD interaction at small distances 265
M.B. Voloshin, Relations between inclusive decay rates of heavy baryons 275
F.J. Ynduráin, Gluon condensate from superconvergent QCD sum rule 287
G. Altarelli, F. Feruglio, Neutrino masses and mixings: a theoretical perspective 295
G.G. Raffelt, Limits on neutrino electromagnetic properties — an update 319
W. Buchmüller, M. Plümacher, Matter–antimatter asymmetry and neutrino properties 329
J. Ellis, N.E. Mavromatos, Comments on CP, T and CPT violation in neutral kaon decays 341
E. Shabalin, The value of ε'/ε in a theory with extended Higgs sector 355
D.A. Ryzhikh, K.A. Ter-Martirosyan, Mass and CKM matrices of quarks and leptons, the leptonic CP-phase in neutrino oscillations 359
